UNITIZED STANDPIPE PRESSURE GAUGE (UMG)

FEATURES:

- Standard Capacities:
  3,000psi, 5,000psi, 6,000psi, 10,000psi, 15,000psi
  Also available in the following scales of measurement: kPa, kg/cm2, MPa, & Bar
- Liquid, glycerine-filed to reduce shock and vibration
- Blow-out plug safety feature for over-pressure situations
- Large 6" dial, visible up to 60 feet
- Dual scale divisions available upon request
- Standard service or H2S service available
- 2 1/6" (5-M) Flange, 2" threaded or 2" 1502 hammer union available

BENEFITS:

- All-in-one design can be mounted on standpipe and seen up to 60 ft. away
- Dampener assembly reduces vibrations and dial bounce for greater measurement accuracy
- Dampener Seal Kit and Diaphragm Cup (CD288) available for easy-field repair
- 360° UMG neck and case connection virtually eliminate fluid leaks
- Pop off connection assists in protecting gauge internals from high pressure kicks

TO ORDER SPECIFY:

- Pressure Capacity
- Scale of Measurment
- Flange, threaded, or hamer union connection
- Standard or H2S service

Crown Oilfield Instrumentation's standpipe gauges provide the same reliability as our 6" gauges, with gauge and protector in one unit. Crown's UMG is available with a variety of connections to fit most applications, in either H2S or standard service. Ideal for pump trucks, mud pumps, stand pipes and choke manifolds, Crown UMGs are easy to see at a distance. Unlike the "parking meter" style gauges, Crown UMGs offer a full-faced dial and dampener assembly, reducing dial bounce and increasing pressure reading accuracy. All Crown gauges are made of only the highest quality material and are easy to repair in the field for many years of service in the field.
