CROWN
OILFIELD INSTRUMENTATION

TENSION LOAD CELLS

FEATURES:

- Available in piston or diaphragm style tension load cells
- Available in 4.0, 6.44, 8.0, 16.1 square inch tension load cell sizes for a variety of load capacities
- Senses hydraulic force and transmits to weight indicator or torque gauge
- Compact design, suitable for use with all major makes of weight indicators and torque gauges
- Designed years of use and to be repaired easily in the field

BENEFITS:

- Easy to install, complete with hose & all necessary connections, just plug in and go
- Machined and built with only the highest quality, durable material to withstand the harshest drilling conditions
- Available for a variety of load capacities and drilling applications
- Repair kits available for easy field repair

TO ORDER SPECIFY:

- Application (weight or torque)
- Load cell size
- Pin hole size (if applicable)

Crown Oilfield Instrumentation's Tension Load Cells are durable and highly reliable. When used with our indicators, these load cells will transmit the applied tension load to the indicator. Whether you use our indicators or any other major brand, our load cells are a perfect hydraulic sensing unit for your application. Our tension load cells are available in a variety of sizes and can be used in numerous applications. Because our load cells are made with only the highest quality materials, they will provide years of service, even in the harshest industry environments.
